

After completing this course "Introduction to Environmental Risks", students will learn the basic approaches and methods for assessing environmental risks. In eight weeks they will learn:

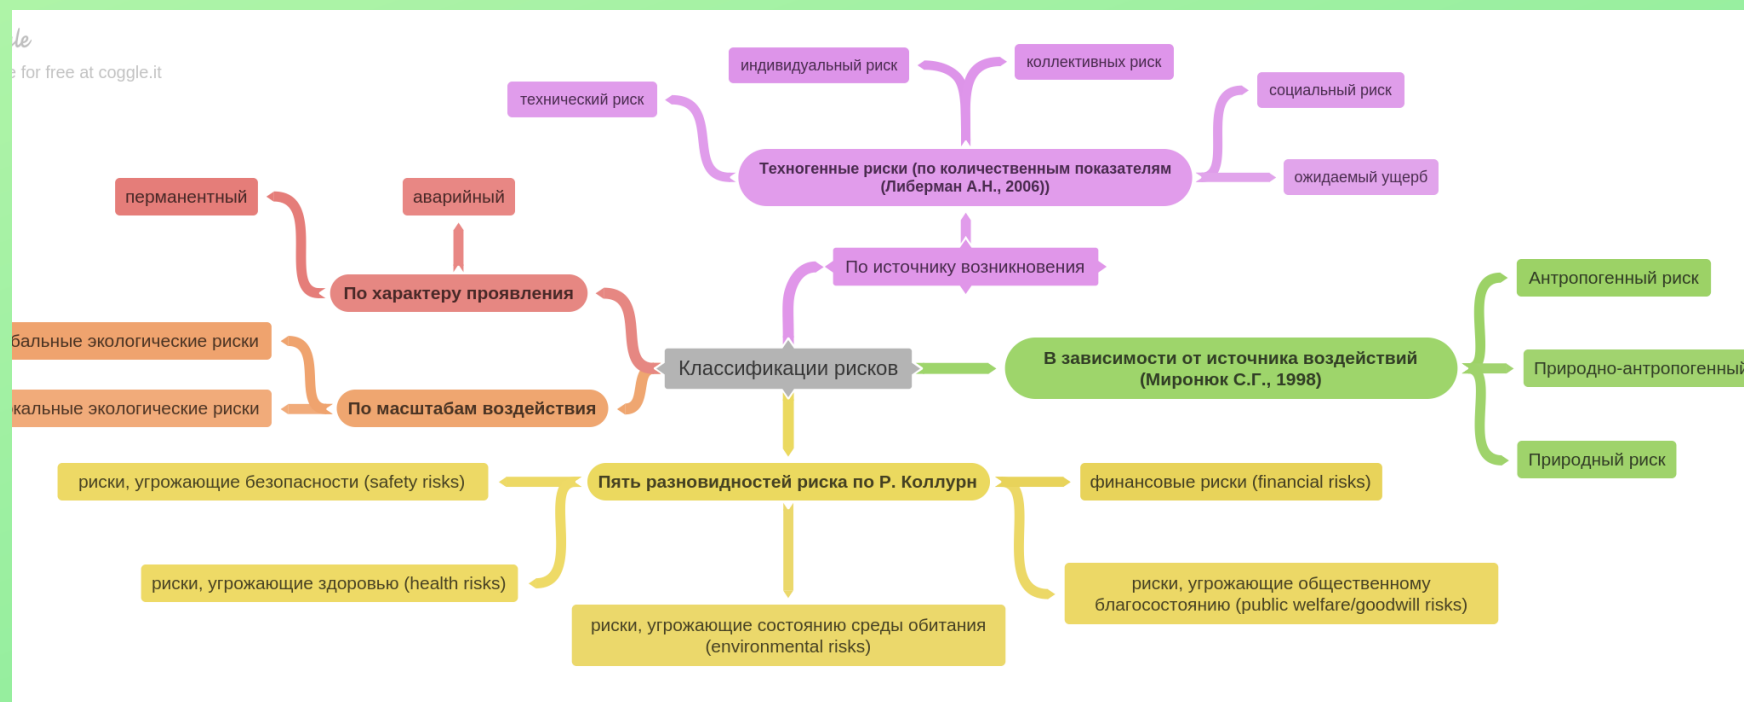

Key concepts, definitions and different approaches

Quantitative calculation methods

Determine the level of risk

Activities

Mind-mapping

Poster making

The poster is titled 'ОЦЕНКА ВОЗДЕЙСТВИЯ НА ОКРУЖАЮЩУЮ СРЕДУ ENVIRONMENTAL IMPACT ASSESSMENT (EIA)'. It features the United States Environmental Protection Agency logo and text in Russian and English. The Russian text describes the EIA process, starting with the National Environmental Policy Act (NEPA) of 1969. It lists seven stages: 1) Screening, 2) Scoping, 3) Impact Assessment, 4) Management of environmental impacts, 5) Reporting, 6) Decision-making, and 7) Monitoring. The poster is credited to 'Бокен А.Е.' (Boken A.E.).

Video lectures

Three video lecture thumbnails are shown. The first is 'Введение в экологические риски' (Introduction to environmental risks) by Ануар Аязбаевич Какбаев, a professor at Kockshetau University. The second is by Айгуль Сапарбековна Курманбаева, also at Kockshetau University. The third is by Наталья Владимировна Динкелакер, a laboratory head at the National Research Center for Information Technologies, Mechanics and Optics in Saint-Petersburg, Russia.
